

MOBILECARE247

Interactive, Connected Care.

This is MobileCare247s. A family of dynamic, online tools that speed the exchange of a patient's relevant health information across a continuum of care in a unique, interactive and collaborative care experience.

MobileCare247s.com

Linking health care professionals to their patients at the pace of real life.

MobileCare247s™ helps establish a powerful, collaborative connection between patients and health care professionals through integrated, secure and easy-to-use Consumer and Care Management Portals.

With MobileCare247s You Can:

- ▶ Have patients establish an individualized Care Team while increasing patient engagement, communication and adherence.
- ▶ Leverage the power of Health Programs by inviting patients to participate, interact and learn.
- ▶ Improve clinical workflows and outcomes by developing a roadmap for individualized care that keeps everyone on target.
- ▶ Engage the community of care and keep information relevant, timely and responsive.
- ▶ Target your specific patients' needs through a multi-lingual platform that reaches more niche markets.
- ▶ Drive loyalty through convenient, engaging care coordination and care management tools that strive to create a community of care.

The MobileCare247s Connected Health Platform is an integrated suite of online Care Management and Consumer Portals that seamlessly connects health care professionals to patients, their families and other members of a patient's individualized Care Team, including other health care professionals.

The MobileCare247s Care Management Portal provides health care professionals with an integrated, secure environment to connect and engage with their patients. This Portal is designed to help the health care professional deliver better patient care, expand access to their services while also optimizing practice efficiency. This Portal supports clinical collaboration as it speeds the exchange of relevant, timely health information across the continuum of care, allowing convenient access to patient information, enables shared decision-making and offers new revenue-generating opportunities.

Patients connect to their health care professionals through the MobileCare247s Consumer Portal. This Portal includes access to the patient's personal health record, secure messaging through which designated Care Team members communicate and interactive Health Programs and Services to help improve patient outcomes.

The MobileCare247s Connected Health Platform offers an open architecture and welcomes strategic partnerships with electronic medical record (EMR) vendors, hospitals, health plans, pharmacies and physician groups who may want their systems to interoperate with some, or all, of the MobileCare247s Platform under their own Private Label branding.
